

CLAIMS

What is claimed is:

- 1 Claim 1 is deleted.
- 2 Claim 2 is deleted.
- 3 Claim 3 is deleted.
- 4 Claim 4 is deleted.
- 5 Claim 5 is deleted.
- 6 Claim 6 is deleted.
- 7 Claim 7 is deleted.
- 8 Claim 8 is deleted.
- 9 Claim 9 is deleted.
- 10 Claim 10 is deleted.
- 11 Claim 11 is deleted.
- 12 Claim 12 is deleted.
- 13 Claim 13 is deleted.
- 14 Claim 14 is deleted.
- 15 Claim 15 is deleted.
- 16 Claim 16 is deleted.
- 17 Claim 17 is deleted.

18 Claim 18 is deleted.

19 (Currently amended) A method of learning and recognition of images using an ABM learning algorithm, an ABM recognition algorithm, an APN learning algorithm, and an APN recognition algorithm comprising:

- a) training a fully connected neural net with the ABM learning algorithm;
- b) classifying images with the ABM recognition algorithm via a stable distribution of an Markov chain;
- c) extending training of a fully connected neural net with the APN learning algorithm from a plurality of a binary neural nets to multi-valued neural nets; and
- d) extending the ABM recognition algorithm with APN recognition algorithm from a plurality of a binary neural nets to multi-valued neural nets wherein extending further comprises:
 - b1) computing a matching score based on the ABM recognition algorithm and a distance between two images.

~~A computer implemented process of claim 1 and 3 (search and classification), wherein the neural layer deploys the ABM or/and APN algorithm.~~

20 Claim 20 is deleted

21 Claim 21 is deleted.

22 Claim 22 is deleted.

23 Claim 23 is deleted.

24 Claim 24 is deleted.

25 Claim 25 is deleted.

26 Claim 26 is deleted.

27 Claim 27 is deleted.

28 Claim 28 is deleted.
